NOTE: For each additional 4' fixture in continuous row, add 48" to length. For continuous row installations, order one individual unit and balance in extension DFKR sections.

Some fixtures' end plates extend over the top of the "T." When using these fixtures, the structure surrounding the DFK is to extend no more than 1-1/2" from the bottom of the "T" as shown. See back views provided on individual specification sheets to identify fixtures with extended end plates.

ASSEMBLE CORNER ANGLES

STEP 1: Insert galvanized corner angles into side and end rails (for individual fixtures) or into side rail and intermediate rail (for continuous row mounting).

FIG 1.1

CEILING MOUNTING

STEP 2:

A. Place the assembled frame into the ceiling opening and support with wire (as shown below) from rigid ceiling structure.

FIG 2.1

B. Install screws through DFK Kit into framing on both sides.

NOTE: Do not overtighten screws & distort ceiling opening in DFK Kit.
